Boyabai Kom Puttinganpanda	8740 3 2	5 5 10	8734 8 4.	- - -	334 - -	469 33 8

* Out of this sum Rs 7000 have been advanced on a loan to the minor as per deed of bond on interest at 5 per cent.

† A promissory note of the value of Rs. 5000 and pots in order to cover the marriage expenses of the Desai which form pleas in the month of February last.

This sum is reserved for paying off instalments of his debts.

§ This includes Rs 340 paid in liquidation of his debts and Rs 768 paid to Government on account of land.

@@ This sum includes the amount of bonds.

The foregoing table shews that only Rs 5. 5. 10 were spent for the expenses of the minor No 4 during the year. Her guardian who is her father has made provision for the year, hence no more was needed. The yearly amount fixed for her expenses is Rs 253 which will be paid for the next year.

In addition to the foregoing table the following is inserted to shew the Government rates and rentals in the several minors' estate :—

Names of minors	Total extent of lands under management	Government Assessment	Amount received on land by sub-letting. Annual value of lease for years and upwards	Annual value of lease for one year.	Total
	acres g a				
Fakirgowda Desai	1623 - -	2273 6 -	4203 14 -	98 10 -	4302 8
Lakshmanrao Mahadev	337734 -	477712	9 6062 6 3	103 - -	6165 6
Shanker Malhar	481 24 -	647 1 -	102 - -	8753 6	9773 6
Bayabai kom Patlingowda	46933 8	3521 1 -	- - -	1191 12 9	1191 12 9

The financial state of the estate of Lakshmanrao Mahadev, minor Jaghirdar of Nebli is far from satisfactory. The liabilities on the estate amount to Rs 34355. In the year under report new debts were contracted at a favourable rate of interest in order to pay off the old debt, the rate of interest of which was too heavy. The prospects of improvement of the estate for the present appear from its enormously encumbered condition to be very far distant. However every proper care is being taken for its amelioration

In the month of August last the estate of Mr Bhaske [illegible] was made over to him as having come of age and being able to manage t affairs of [illegible]. [illegible] was placed under the management [illegible] of the collectorate in the month of May 870 [illegible] [illegible] [illegible]

This reflects great credit both on the care bestowed by Government on his education and for the protection of his interests.

28. Village officers. The efficiency of the village Revenue Officers and the individual changes which have taken place are shewn in the following table:

Office	Total number in the Collectorate	Revenue officers punished by		Vacancies during the year.			Vacant on the 30th June.
		Fine	Dismissal	By death or resignation	By installation	By dismissal	
Revenue Patels	1392	57	4	68	203	6	228
Village accountants	975	79	7	53	192	8	187

There are in all 1206 Patelki and 1185 Kulkarnki Watans in this Collectorate and the enquiry as to who are representative Watandars has been completed for 813 of the former and 900 of the latter.

The following table shows the number of watans remaining to be enquired into on the 30th June 1879 and also the number enquired into during the year under report

Talukas.	No. of cases remaining enquired into on 30th June 1879			No. enquired into during the year under report			Balance to be enquired into		
	Patilki	Kulkarnis	Total	Patilki	Kulkarnis	Total	Patilki	Kulkarnis	Total

Total	456	376	832	63	91	154	393	285	678

The number of cases enquired into by the First Assistant Collector at Hubli, viz: 11 out of 21, and by the District Deputy Collector at Karajgi, viz 41 out of 89 is very satisfactory; but the same remark cannot be made as regards the Gadag and Bankapur Talukas of the First Assistant Collector, or the Hangal taluka of the District Deputy Collector's charge. For the First Assistant Collector it may be said that he only came at the end of December and took leave for four weeks in the fair season which necessarily abridged his time for conducting these enquiries. The same remark does not apply to the District Deputy Collector; as he has however enquired into double the number of cases decided by both the Assistant Collectors.

[redacted] reflects great credit both on the care bestowed by Government in his education and for the protection of his interests.

28. Village officers. The efficiency of the village Revenue officers and the individual changes which have taken place are shewn in the following table:

The number of cases enquired into by the First Assistant Collector at Hubli, viz: 11 out of 21, and by the District Deputy Collector at Karajgi, viz: 41 out of 89 is very satisfactory; but the same remark cannot be made as regards the Gadag and Bankapur talukas of the First Assistant Collector, or the Hangal taluka of the District Deputy Collector's charge. For the First Assistant Collector it may be said that he only came at the end of December and took leave for four weeks in the fair season which necessarily abridged his time for conducting these enquiries. The same remark does not apply to the District Deputy Collector; but however further time will be the remedy for this as decided by both the Assistant Collectors.

The District Deputy Collector has had more work of this kind left for him to do by his predecessors than the other Assistants. He has only been two years in charge of the Southern talukas and in that time he has settled 178 cases out of 674 which had to be enquired into when he took charge. Much also remains to be done on these talukas in the way of appointing Patels and Kulkarnees from among the hereditary Government village servants, the period of service of many having expired without any one having been appointed to succeed them. This was on several occasions brought to the notice of the District Deputy Collector by the Deputy Collector while on tour who has observed that more was once been done to remove the grievances of the other hereditary Patels and Kulkarnees who wish to serve in their turn.

(6) Supervision.

29. In the year under report the Collector settled the Jamabandy in three talukas. The talukas settled by the Collector in the preceding three years and also those

settled

scheme in the year under report are shown in the following table.

1876-77	1877-78	1878-79	1879-80
Karajgi Ron	Kalghatgi Hangal	Gadag Navalgund Ranebennur	Ron Badami

C S-3/28

According to the recent orders of Government contained in their Resolution No 4305 of 23rd August 1878 the Collector is required to do the Jamabandy of one taluka in each assistant charge every year. So every taluka in this Collectorate which contains eleven talukas will come under the Collector's direct supervision every fifth or sixth year. Every taluka and Peta in the Zilla has been visited by me this year and all the chief roads have been inspected. The greatest needs of means of communication seems to be in Kod taluka which has no road through the centre of it, ie from Hirekerur (the Mamlatdar's station) to Kode and Byadgi

The District Deputy Collector has had more work of this kind left for him to do by his predecessors than the other Assistants. He has only been two years in charge of the Southern Talukas and in that time he has settled 175 cases out of 574 which had to be enquired into when he took charge. There also remains to be done in these Talukas in the way of appointing Patels and Kulkarnees from among the hereditary Government village servants, the period of service of many having expired without any one having been appointed to succeed them. This was on several occasions brought to the notice of the District Deputy Collector by the Acting Collector when on tour in his District and it is believed that more has since been done to remove this grievance. The other hereditary Patels and Kulkarnees who wish to serve in their turn.

Kunivennur taluka. It is intended to submit this work from Local Funds.

30 The Huzur Accounts Department and Record Room were examined partly in the month of November and partly in December last. The English memorandum of errors etc. despatched to the Huzur Deputy Collector in the February 1880 was finally disposed by the Huzur Deputy Collector on the 18th May 1880

The condition of the official library is reported by the Huzur Deputy Collector to be satisfactory.

During the year under report 20 books new presentations as shewn in Appendix L. were received making in all 1352 consisting of books, pamphlets, maps and plans which are in good order.

Last year Government made a remark to the effect that the missing books if not found, should be replaced by the officers responsible for them. All the books with the exception of a few translations and two small pamphlets are now found and replaced. A separate report regarding these will be shortly submitted to you.

Canikenur	1876-77	1878	1877	
Kangal	1876-77	1877	1877	
Karajgi	1876-77	1878	1877	
Kalpatpi	1876-77	1877	1877	
Kodur	1876-77	1877	1877	
Ran	1876-77	1878	1877	

All those [illegible] in the year under report the years revenue records [illegible] destroyed in all the offices except a few of the Mamlatdars' Offices. The Mamlatdar's Kacheri at Sanquelim has been entirely burnt down. In the Mamlatdar's Office the [illegible] has been destroyed. That of the year 1879 will be shortly destroyed along with those of the other District Offices, which are being stored. Those of subsequent years cannot be destroyed now as they are ordered by a Circular Order of the High Court to be kept for 6 years after the date of collection.

34. The Collector's Appellate Jurisdiction was not exercised as there were no appeals preferred during the year under report; hence the necessity of appending a table is dispensed with.

35. The Cotton Factories Act was worked in this District by an Inspector, an Assistant Inspector and three Sub-Inspectors. The number of Officers employed during the year under report are shewn in the following table :-

Year.	Total number of.				Number of persons		
	Steam Spinning mills.	Spinning and weaving mills.	Half-timers.	Full timers	Prosecuted	Convicted	Acquitted
1878-79	2	-	-	4	6	5	1
1879-80	2	-	-	4	7	7	-

All the under report Sub Offices were Examined by me; all the Assistants have also once examined the offices in their charge. The 2nd Assistant Collector twice examined the three offices in his charge. Thus it will be observed that two offices were examined thrice and the remaining nine twice. The examination of the Sub Registrar's Office at Dharwar commenced in June; but other work intervening it was not completed within the year under report. It is now being completed.

33. The destruction of Useless Records not more than five years old will be seen from the following table showing the taluks year by which they have been destroyed in each of Mamlatdar's Kacheris.

Offices.	Revenue.	Magisterial.	Miscellaneous.	No of villages of which records have been destroyed.
Hubli	1876-77	1872	1876.	
Dharwar	1876-77	1877	1877	9
Mugad	1876-77	1877	1877	
Kalghi	1876-77	1876	1877	
Nawalgund	1876-77	1877	1877	36
Navgund	1875-76	1876	1876	26
Gadag	1876-77	1878	1877	2
Mundargi	1876-77	1876	1876	
Bankapur	1876-77	1878	1877	
Ranibennur	1876-77	1878	1877	74
Hangal	1876-77	1877	1877	8
Karajgi	1876-77	1878	1877	16
Kalghatgi	1876-77	1877	1877	
Kod	1876-77	1877	1877	179
	1876-77	1878	1877	55

This shows that in the year under report no
Years revenue record has been destroyed
in all the offices except in that of the Nargund
Deputy the Mahalkari of which has been called
upon to explain the cause of this. In the Assistant
Magistrate's Office the Magisterial records for 1872
has been destroyed; that of the year 1873 will
be shortly destroyed along with those of the
other First Class Magistrates' Offices, which are
being sorted. Those of the subsequent years
cannot be destroyed now as they are ordered
by a Circular Order of the High Court to be
kept for 6 years after the date of decision.

34. The Collector's Appellate Jurisdiction
was not exercised as there were no appeals
preferred during the year under report; hence
the necessity for subjoining a table is
dispensed with.

35. The Cotton Frauds Act was worked
in this district by an Inspector, an Assistant
Inspector and three Sub-Inspectors. The
number of offences brought to light during the
year under report are shown in the following table:—

Year.	Total number of steam spinning mills.	Spinning mills.	Spinning and weaving mills.	Half-presses.	Full presses.	Number of persons Prosecuted	Convicted	Acquitted
1878-79	2							
1879-80	2							

Offices under report. Such Offices were Examined by me; all the Assistants have also once examined the Offices in their charges. The 2nd Assistant Collector twice examined the three Offices in his charge. Thus it will be observed that two Offices were examined thrice and the remaining nine Offices. The examination of the Sub Registrar's Office at Dharwar commenced in June, but other work intervening it was not completed within the year under report. It is now being completed.

33. The destruction of useless Records is not much in arrears as will be seen from the following table showing the latest year up to which they have been destroyed in each Mamlatdar's Kacheri

Offices.	Revenue.	Magisterial.	Miscellaneous.	which	villages of

Karajgi	1876-77	1878	1877		16	
Kalghatgi	1876-77	1877	1877		—	
Kod	1876-77	1877	1877		179.	
Ron	1876-77	1878	1877		55.	

This shows that in the year under report no year's revenue record has been destroyed in all the offices except in that of the Nargund Dethas, the Mahalkari of which has been called upon to explain the cause of this. In the City Magistrate's Office the Magisterial records for 1872 has been destroyed. That of the year 1873 will be shortly destroyed along with those of the other First Class Magistrates' Offices, which are being sorted. Those of the subsequent years cannot be destroyed now as they are kept by a Circular Order of the High Court to be kept for 6 years after the date of decision.

94. The Collectors Appellate Jurisdiction was not exercised as there were no appeals preferred during the year under report; hence the necessity for subjoining a table is dispensed with.

95. The Cotton Frauds Act was worked in this District by an Inspector, an Assistant Inspector and three Sub Inspectors. The number of offences brought to light in the year under report are shewn in the following table :—

Year.	Total number of Ginning mills.	Spinning mills.	Spinning and weaving mills.	Half Presses	Full Presses	Number of persons Prosecuted	Convicted	Acquitted

It appears from the above that there was one more prosecution during the year under report than in the year before.

Allotted for eleven months only as the Salt Department was abolished from 1st April 1880 (Vide Government Resolution No. 816, dated 8th April last, Revenue Department).

Special Measures.

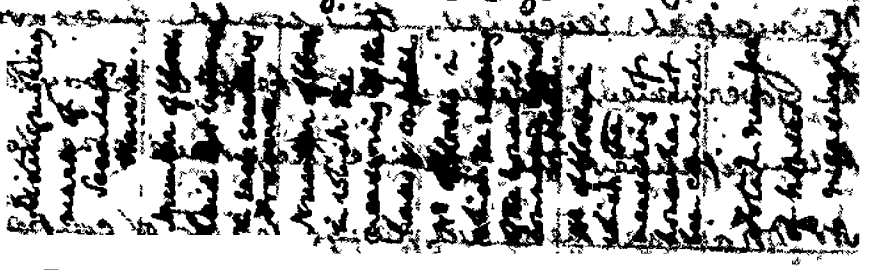
36. Settlement. During the year under report the revision settlements of 110 villages in the Sub-Kas were completed by the Assistant Collectors. Superintendent of Land Revenue Survey, assisted by Messrs. Muir and Willoughby. The Jamabandy of the Talukas of Dharwar, Kalgutgi, Kod, Hangal and Puna was also done by the Assistant Collectors, the District Deputy Collectors and myself. The Revising Settlement having been introduced in the preceding year

	number of villages
Dharwar	1
Hubli	1
Gadag	16
Miraj	23
Ron	2
Kalgutgi	67
Total	110.

37. Survey. The Survey in Hubli was carried on during the months of July, August and September last, and then suspended to allow of the enquiry into titles being advanced somewhat nearer to date. In all the sites of 952 houses

were

were measured during the above period
as will be seen from the following table:



A	
B	
C	
D	
1919-20	932.

In Dharwar all field work has been previously completed. Nothing has yet been done to ascertain the ~~incidence~~ expenditure ~~per square~~ of their ~~Surveys~~. What a survey of the ground from ~~one~~ by a Civil Engineer ~~would~~ would have cost ~~would~~ and would ~~have~~ be of such a nature as ~~would~~ would have been ~~of~~ great use ~~in~~ in showing ~~the~~ surface drainage or ~~the~~ brings the drinking water into the town. This has however still to be done. The measurements of the area occupied by the different yards, houses and gardens have as yet proved fruitless in any pecuniary return both to Government and the Municipalities

It appears from the above that there was one more prosecution during the year under report than in the year before. The information above tabulated is for eleven months only as the Cotton Department was abolished from the 1st of June 1880 (Vide Government Resolution No. 1881 dated the 8th April last, Revenue department)

(C) Special Measures.

36. Settlement. During the year under report the revision settlement of 110 villages as per margin by Mr. Fletcher, Superintendent, in Talukas.

	Number of villages	Revenue Survey,
Dharwar	1	effected by Messrs.
Hubli	11	Muir and Wiltshire.

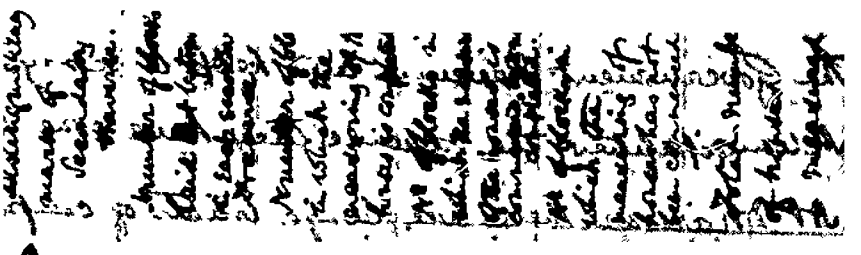
Collectors, the District Deputy Collectors and myself, the revenue settlement having been introduced in the preceding 4

37. The work of the Cotton Survey in Hubli was carried on during the months of July, August and September last, and then suspended to allow of the enquiry into tolls being advanced somewhat nearer to date. In all the sites of 952 houses

were

were measured during the above period as will be seen from the following table:



A	
B	
C	
D	
Total for 1879-80	

In Dharwar all field work has been previously completed

Nothing has yet been done to indemnify the Municipalities for giving up the [illegible] of their town sites. Were a survey of the ground been taken by a Civil Engineer it would have cost [illegible] and would further [illegible] such a knowledge of the different levels of different parts of the town as would have been of great use in improving surface drainage or bringing the drinking water into the town. This has however still to be done. The measurements of the area occupied by the different wards, houses and gardens have as yet proved fruitless in any pecuniary return both to Government and the Municipalities

It appears from the above that there was one less prosecution during the year under report than in the year before. The information above tabulated is for eleven months only as the Cotton department was abolished from the 1st of June 1880 (Vide Government Resolution No 1810, dated the 8th April last, Revenue department).

(C) Special Measures.

36. Settlement. During the year under report the revision settlement of 110 villages as per margin by Mr. Hatcher, Superintendent, Revenue Survey, assisted by Messrs. Muir and Wiltshire.

Talukas.	Number of villages.
Dharwar	1
Hubli	4
Gadag	
Mundargund	3
Ron	2
Kopal	97
Total	110.

The jamabandy of the talukas of Dharwar, Kalghatgi, Kod, Kopal and Ron was also done by the Assistant Collectors, the District Deputy Collector and myself, the revision Settlement having been introduced in the preceding year.

37. The work of the town Survey in Hubli was carried on during the months of July, August and September last, and then suspended to allow of the enquiry into titles being advanced somewhat nearer to date. In all the sites of 652 houses

were

were measured during the above period as will be seen from the following table:

A
B
C
D

tal for
879-80

952.

In Dharwar all field work has been previously completed.

Nothing has yet been done to indemnify the Municipalities in question the cost of their town Surveys. Had a Survey of the ground been taken by a Civil Engineer it would have cost far less and would have led to such a knowledge of the different levels of different parts of the town as would have been of great use in improving surface drainage or in bringing the drinking water into the town. This has however still to be done. The measurements of the area occupied by the different wards, houses and gardens have as yet proved fruitless in any pecuniary return both to Government & the Municipalities

[illegible] could be placed upon them
sites and a percentage of it given to add to the
Municipal revenues, this would increase
the Government Revenue and more or less the
Municipalities the [illegible] may have got to.
At Dharwar there are large tracts of compound
gardens and in some cases even cultivated
fields not assessed at all. There are also five
large compounds and spaces of ground in the
most valuable part of the town of Hubli for
which no assessment is placed. I understand
however that some difficulty exists in the matter,
because these sites were entered in the occupants'
names at the first Survey of the years 1846 and
1847; and whereby by section 5 of Act IV of 1868
the Collector the occupancy rights save some
few fees from payment for such lands unless
[illegible] it is now considered illegal to charge
them for Land Revenue. It is said, and it
would appear that the fees which were
formerly levied in section 132 of Bombay Act V of
1879 are the only ones which can be now levied
by the words of January last a public notice
was issued in the towns of Hubli and Dharwar,
but the classification of houses under the rules
prescribed under that section by Government
was

[illegible]

38. The operations of the Survey Settlement during the year under report have been tabulated as shown below:-

Nature of Settlement.	1878-79. Cases decided	1878-79. Survey fields.	1879-80. Cases decided	1879-80. Survey fields.	Cases pending.	Estimate of Survey fields & Cases to be disposed of.
Act II of 1863		71	109	132		
Hereditary Officers		1	1	37		
Village Officers		11	14	56		
Total		83	124	225		

assessment could be placed upon these sites and a percentage of it given to add to the Municipal revenues, this would increase the Government Revenue and help to relieve the Municipalities of the expense they have now to bear. At Dharwar there are large tracts of compound and gardens, and in some cases even cultivated fields not assessed at all. There are also some large compounds and spaces of ground in the most valuable part of the town of Hubli which no assessment is placed. I understand however that some difficulty exists in the matter because these sites were entered in the occupants' names at the first Survey of the years 1843 and 1844; consequently by section 5 of Act IV of 1868 as because the occupants thereof have held them free from payment for more than twelve years, it is now considered illegal to assess them for Land Revenue. In that case it would appear that the fees which were referred to in section 132 of Bombay Act V of 1879 are the only ones which can be now levied. In the month of January last a public notice was issued in the towns of Hubli and Dharwar, but the classification of houses under the rules prescribed under that section by Government

[illegible] as per the Act, be exempt the duty of the Survey Fee prescribed by Government, as section 92 lays down that the Survey Fee shall be payable within six months from the date of a public notice to be given for that behalf by the Collector. Many Ryots cannot do their labours, & have brought their matter to notice, because both the Taluk and Dharwar Municipalities are in great need of money to pay for improvements in their water supply and conservancy, and to have suspended large sums of money in paying for the Surveys of their Cowle lands [illegible]

38. The information regarding the working of this Summary Settlement during the year under report has been tabulated as shewn below:

Nature of Settlement.	1878-79. Cases decided	1878-79. Lands thereon	1879-80. Cases decided	1879-80. Lands thereon	Estimated Entries. Cases pending	Estimated Entries. Lands to be given	Estimated Entries. Lands to be re-given
Under Act II of 1863	-	71	-	104	-	132	
Hereditary Officers	-	1	-	1	-	37	
Village Officers		11	-	14	-	56	
Total		83	-	124	-	225	

Assessment could be placed upon these sites and a percentage of it [illegible] Municipal revenues. and would increase the Government Revenue and help to relieve the Municipalities the expense they have gone to. At Dharwar there are large tracts of compound and gardens, and in some cases even cultivated fields not assessed at all. There are also some large compounds and spaces of ground in the most valuable part of the town of Hubli on which no assessment is placed. I understand however that some difficulty exists in the matter because these sites were entered in the occupants' names at the first Survey of the years 1844 and 1844; consequently by section 5 of Act IV of 1868 and because the occupants thereof have held them free from payment for more than twelve years, it is now considered illegal to assess them for Land Revenue. In that case it would appear that the fees which are referred to in section 132 of Bombay Act V of 1879 are the only ones which can be now levied. In the month of January last a public notice was issued in the towns of Hubli and Dharwar, but the classification of houses under the rules prescribed under that section by Government

Work not completed because the City of the Survey Fees are forbidden by Government as section 132 lays down that the Survey Fee shall be payable within six months from the date of a public notice to be given on this behalf by the Collector. Survey Fees cannot be realised. I have brought this matter to notice, because both the Hubli and Dharwar Municipalities are in great need of money to pay for improvements in their water supply and conservancy; and they have expended large sums of money in preparing for the Surveys of these towns without any adequate return.

38. The information regarding the working of the Summary Settlement during the year under report has been tabulated as shewn below:

Nature of Settlement.	1878-79. Cases decided	1878-79. Sanads issued	1879-80. Cases decided	1879-80. Sanads issued	Cases pending	Estimated balance. Sanads to be issued	Sanads to be re-issued
Under Act II of 1863	-	71	-	107	-	132	
Hereditary Officers	-	1	-	1	-	37	
Village Officers		1	-	4	-	56	
		93		24		225	

[illegible] it appears that in the year under report 41 more sanads were issued during the year under report than in the previous year — Attention is being paid to this work and it is hoped that a few years more will see it completed.

Strict orders have been issued to the Mamlatdars of all talukas to impress on the heirs of the deceased Inamdars the necessity of applying to them for the entry of their names in the room of their deceased predecessors and to receive such applications

[illegible] the work of [illegible] satisfactorily. It is the duty of the Mamlatdar to do this.

39. Waste lands in the following table the area of land lying waste at the end of the year under report as compared with that of the preceding year.

Talukas.	Waste land [illegible] at the end of the year 1878-79			1879-80		
Karwar	55	21	[illegible]	[illegible]	4768	18
Kumta					3636	12
Honavar				25	20	365 2
Gadag	-	-	[illegible]	[illegible]	20937	11
Bankapur	-	-	[illegible]	[illegible]	5202	7
Ranibennur	-	-	30424	35	40879	26
Hangal	-	-	9072	17	10116	1
Karajgi	-	-	18095	16	22812	16
Kalghatgi	23	17	24	5	7047	9	7123	2
Kod					[illegible]	28662	15
Ron				93	8	624	4
Total	109	38	24	5	106096	1	137171	32 4
				Net increase in 1879-80.		31075	31 6

~~From this it appears that in the year under report 24 Sanads were issued leaving~~ a balance of 22 still to be issued.

~~The cases which prevented the issue of~~ these Sanads during the year under report were the same as those enumerated in my ~~last~~ year's Administration Report. It is needless to mention them here as I would be travelling over the same grounds again. Sanads to non residents were issued during the year under report through the Collectors of the Districts in which the ~~absentees~~ resided in accordance with the suggestion of the Commissioner S.D. embodied in Government Resolution No. 4607 dated the 30th August last (Revenue department).

From the above table it will appear that 41 more Sanads were issued during the year under report than in the previous year — Attention is being paid to this work and it is hoped that a few years more will see it completed.

Strict orders have been issued to the Mamlatdars of all talukas to impress on the heirs of the deceased Inamdars the necessity of applying to them for the entry of their names in the room of their deceased predecessors and to receive such applications.

~~Cultivable waste land is made over to applicants for the~~ ~~purpose of cultivation on certain conditions. The Mamlatdars~~ ~~have the power of granting waste lands to cultivators for~~ ~~the term of one year. The Mamlatdars are entrusted with~~ ~~the work of issuing waste lands to applicants satisfactorily. It is the duty of the Mamlatdars~~ to do this

39. Waste lands. The following table shows the area of land lying waste at the year under report as compared with that of the preceding year:

Talukas.	Waste lands taken up during the year 1878-79		Waste lands taken up during the year 1879-80		Waste remaining at the end of the year 30th June 1879		Waste remaining at the end of the year 30th June 1880	
Dharwar	86	21			4102	29	4768	15
Hubli					130	7	736	14
Nawalgund					25	20	355	2
Gadag					11674	26	26937	11
Bankapur					3793	18	5202	7
Ranibennur					30424	35	40879	26
Hangal					9072	17	10116	1
Kurajgi					18095	16	22882	16
Kalghatgi	23	17	24	5	7047	9	7023	2
Kod					27746	18	28852	15
Ron					103	8	624	4
Total	109	38	24	5	106096	1	137171	32·6
					Net increase in 1879-80.		31075	31·6

From this it appears that in the years under report 124 Sanads were issued leaving a balance of 225 still to be issued.

The cases which prevented the issue of the Sanads during the year under report were the same as those enumerated in the last year's Administration Report. To mention them here would be travelling over the same ground again. Sanads to non residents were issued during the year under report through the Collectors of the districts in which the absentees resided, in accordance with the suggestion of the Commissioner S.D. embodied in Government Resolution No. 4607 dated 7th October last (Revenue department.)

From the above table it will appear that 1 more Sanads were issued during the year under report than in the previous year — Attention is being paid to this work and it is hoped that a few years more will see it completed.

Strict orders have been issued to the Mamlatdars of all talukas to impress on the heirs of the deceased Inamdars the necessity of applying them for the entry of their names in the room of their deceased predecessors and to receive such applica-

~~and the circumstances under which they~~ ~~have been~~ ~~effected~~ ~~the~~ ~~Talukas~~ ~~and~~ ~~the~~ ~~Sub-divisions~~ ~~of~~ ~~each~~ ~~Taluka~~ ~~and~~ ~~the~~ ~~Villages~~ ~~in~~ ~~each~~ ~~Sub-division~~ ~~and~~ ~~the~~ ~~Survey~~ ~~Numbers~~ ~~in~~ ~~each~~ ~~Village~~ ~~and~~ ~~the~~ ~~Hissa~~ ~~Numbers~~ ~~in~~ ~~each~~ ~~Survey~~ ~~Number~~ ~~and~~ ~~the~~ ~~area~~ ~~of~~ ~~each~~ ~~Hissa~~ ~~Number~~ ~~and~~ ~~the~~ ~~assessment~~ ~~of~~ ~~each~~ ~~Hissa~~ ~~Number~~ ~~and~~ ~~the~~ ~~name~~ ~~of~~ ~~each~~ ~~holder~~ ~~of~~ ~~each~~ ~~Hissa~~ ~~Number~~ ~~and~~ ~~the~~ ~~date~~ ~~of~~ ~~the~~ ~~grant~~ ~~and~~ ~~the~~ ~~conditions~~ ~~of~~ ~~the~~ ~~grant~~ ~~and~~ ~~the~~ ~~work~~ ~~of~~ ~~issuing~~ ~~Pattas~~ ~~and~~ ~~Counterparts~~ ~~and~~ ~~the~~ ~~manner~~ ~~in~~ ~~which~~ ~~the~~ ~~work~~ ~~is~~ ~~performed~~ ~~satisfactorily~~. It is the duty of the Mamlatdars to do this.

39. Waste lands. The following table shows the area of land laying waste in the year under report as compared with that of the preceding year:

Talukas.	Waste lands taken up.				Waste remaining at the end of the year.			
	1878-79		1879-80		1878-79		1879-80	
Dharwar	86	21			4102	29	4768	15·6
Hubli	-	-	-	-	130	7	736	14
Navalgund	-	-	-	-	25	20	355	2
Gadag	-	-	-	-	11674	26	20937	11
Bankapur	-	-	-	-	3773	16	5202	7
Ranibennur	-	-	-	-	30424	35	40879	26
Hangal	-	-	-	-	9072	17	10116	1
Kurajgi	-	-	-	-	18095	16	22882	16
Kalghatgi	23	17	24	5	7047	9	7023	2
Kod	-	-	-	-	21746	18	23652	15
Kon	-	-	-	-	103	8	624	4
Total	109	38	24	5	106096	1	137171	32·6
					Net increase in 1879-80.		31075	31·4

The following table shows the changes in the year under report as have taken place in the waste lands of acres 31075 and 3/4 fronting the details of which are as follows

Waste land taken up for cultivation during the year.		
Land found up at the measurement at the time of Revision.		
Given as inam to Ketkurdies to make up their emoluments according to the sanctioned scale reserved for special purposes at the time of Revision	843	17
Total	4838	28
Land relinquished by Ryots owing to increased rates of assessment	20218	3
Land altered as waste owing to the liability of Ryots to pay the assessment thereon as per Govt. Rule No 33/09 the 24th June 1879	3010	
Lapsed Inam Land altered as waste.	147.	
Land previously reserved for special purposes, but brought under the head "Waste at the time of Revision.	47.	10
Area increased at the time of Revision Survey.	723	28 6
	35914	16 6
Net increase	31075	3/4.

40. Agriculture. No experiments of any value

Experimental farms in the Collectorate were closed by orders of Government.

41. The experiment of sowing the seed of some exotic trees was made by the Assistant Conservator of Forests in the Talkunkop plantation in the Mahuva taluka in the year under report, the result of which is given below:

The plants of the Australian Acacia (Acacia heterophylla) succeed and are coming on well. The Swietenia Mahogani plants are in good condition and promise success.

Other species of Eucalyptus were sown and after germination were transplanted. Only one species however is coming on fairly. The other will not succeed in the plantation.

Casuarina equisetifolia. A large number of seedlings of this tree were transplanted during the rains, and they are coming on speedily.

42. No ... cultivated with Cotton during the year under report has slightly decreased as will be seen from the following

Further details will be found in Appendix B.

The foregoing table shows that during the year under report there has been a decrease in the waste lands of acres 310.15 and 31½ gunthas, the details of which are as follows:

Waste land taken up for cultivation during the year and formed part of the measurement at the time of Revision.			
Given as Inam to Shetsundis to make up their emoluments pending the sanctioned scale			
Reserved for special purposes at the time of Revision	843	17	
Total	4938	28	
Land relinquished by Ryots owing to increased rates of assessment.	20218		
Land entered as waste owing to the inability of Ryots to pay the assessment thereon as per Govt. Res. No. 3310 of the 24th June 1879	13010		
Lapsed Inam Lands entered as waste.	1491		
Lands previously reserved for special purposes, but brought under the head "Waste at the time of Revision.	471	16	
Area increased at the time of Revision Survey.	723	28	6
	35914	16	6

Net increase 310.15 31½.

40. Appendix. As reported last year the experimental farm on this Concession were closed by orders of Government.

41. The experiment of sowing the seed of some exotic trees was made by the Assistant Conservator of Forests in the Salkentop plantation in the Dharwar taluka in the year under report, the result of which is given below:

The plants of the Australian Acacia (Acacia heterophylla) succeed and are coming on well. The Swietenia Mahogani plants are in good condition and promise well.

Other species of Eucalyptus were sown and after germination were transplanted. Only one species however is coming on fairly. The others will not succeed in the plantation.

Cassuarina equisetifolia. A large number of seedlings of this tree were transplanted during the rains, and they are coming on exceedingly well.

42. The area cultivated with cotton during the year under report has slightly decreased as will be seen from the following table. Further details will be found in Appendix E.

The foregoing table shows that during the year under report there has been an increase in the waste lands of acres 3107⅝ and 31⅜ granted, the details of which are as follows:-

	A.	G.
Waste lands taken up for cultivation during the year.	3522	21
Area found less in the measurement at the time of Revision.	423	13
Given as Enam to Shetsundies to make up their emoluments according to the sanctioned scale.	49	17
Reserved for special purposes at the time of Revision	12	17
Total	4838	28
Land relinquished by Ryots owing to increased rates of assessment.	2021⅜	
Land entered as waste owing to the inability of Ryots to pay the Assessment thereon as per Govt. Rev. No 331 of the 24th June 1873	13010	
Lakhraj Enam Lands entered as waste.	1491	
Land previously reserved for special purposes, but brought under the head "Waste at the time of Revision.	471	
Area increased at the time of Revision Survey.	723	28 6
	35914	16 6

Net increase 31075 31⅜.

40. Agriculture. As reported last year the Experimental Farms in the Collectorate were closed by orders of Government.

41. The experiment of sowing the seeds of some exotic trees was made by the Assistant Conservator of Forests in the Talkuntop plantations in the Dharwar taluka in the year under report, the result of which is given below:

The plants of the Australian Acacia tree (Acacia heteropaylla) succeed and are coming on well. The "Swietenia Mahogani" plants are in good condition and promise success.

Other species of Eucalyptus were sown and after germination were transplanted. Only one species however is coming on fairly. The other species will not succeed in the plantation.

Casuarina Equistifolia. A large number of seedlings of this tree were transplanted during the rains, and they are coming on exceedingly well.

42. The area cultivated with Cotton during the year under report has slightly decreased as will be seen from the following table. Further details will be found in Appendix E.

Area	Estimated produce in Khandies.	Area	Estimated produce in Khandies.
479489	74202·1024	47391	8767·40

This shews that there has been an increase in the estimated produce. Though the area cultivated with cotton in the year previous was larger; the crops were however then destroyed in field rats. The destruction of which during the year under report has produced this very satisfactory result. The large sum of Rs 95173: 13: - was then spent during the last year in destroying more than nine (95,00,000) million five hundred thousand rats in this district. This pest was most numerous in the black soil plains where the wheat and other crops are grown chiefly; their burrows were in every earthen boundary mark and extended in the cracks of the soil to every field, so that the seed was eaten as fast as it could be sowed. Had this large sum not been granted by Government the district would have been cursed by a famine with far worse consequences than the last one of 1876-77 for this reason that the pest would have remained

and

[illegible] it is not of digging earth or [illegible] ments, to leave the [illegible] were engaged in [illegible] odeepatch. [illegible] fail rat-killers [illegible] [illegible] and many [illegible] [illegible] Energy to dig [illegible] their fields. Acting on the orders of Govern-ment officials exhorting the Assistant Collectors, the Collector Inspector and all the Sub-Assistants and [illegible] have succeeded in urging the villagers to turn out in large numbers to destroy the pests which were infesting their own fields. It was often found necessary to impress upon the ryots that no remissions would be given in future if the destruction of crops by rats were urged as an excuse for not paying the assessment

Area	Estimated produce in Khandies.	Area.	Estimated produce in
4794089	34 74282 · 10	4739178	86709 · 40

These shews that there has been an increase in the Estimated produce - though the area cultivated with cotton in the year previous was lesser : the crops were however then devoured by field rats, the destruction of which during the year under report has produced this very satisfactory result. The large sum of Rs 95173. 13. - was spent during the last year in purchasing rats from the people (95,000 million five hundred thousand rats in this district. This pest was most numerous in the black soil plains where the wheat and cotton crops are grown chiefly ; their burrows pierced every earthen boundary mark and extended in the cracks of the soil to every bear, so that the seed was eaten as fast as it could be sowed. Had this large sum not been granted by Government the district would have been cursed by a famine with far worse consequences than the last one of 1876-77 for this reason that the pest would have remained

and

[illegible] which was especially at this season
[illegible] willing enough [illegible] to the native
[illegible] and it was only the help of a certain
which induced the [illegible]
is that of digging earth for brick and cement
ments, to clear the public works there they
were agreed to take to rat-killing as a regular
occupation. There men were the most success-
ful rat-killers during all the days of the Cawn-
pore and many Mahomedans came to
some business. The collectors were utterly
unable to cope with the vermin and
most rather they used to assist the people
energetically to dig them out of their burrows in their
fields. Nothing but the exertions of Govern-
ment officials including the Assistant
Collectors the Cotton Inspector and all the
Sub Inspectors and of the Police who would
have succeeded in urging the villagers to
turn out in large numbers to destroy the
pests which were infesting their own fields.
It was often found necessary to enforce upon
the ryots that no remissions would be given
in future if the destruction of crops by rats
were urged as an excuse for not paying the

Area	estimated produce in Khandies	Area.	Estimated produce in Khandies.

These shews that there has been an increase in the Estimated produce – though the area cultivated with cotton in the year previous was larger; the crops were however then devoured by field rats the destruction of which during the year under report has produced this very satisfactory result. The large sum of Rs. 45173. 13. – was spent during the last monsoon in destroying more than nine (95,00,000) million five hundred thousand rats in this district. This pest was most numerous in the black soil plains where the wheat and cotton crops are grown chiefly; their burrows pierced every earthen boundary mark and extended in the cracks of the soil on every side, so that the seed was eaten as fast as it could be sowed. Had this large sum not been granted by Government the district would have been curst by a famine with far worse consequences than the last one of 1876-77 for this reason that the pest would have remained

and

Only the ryots were peculiarly to blame, apart from the fact that nothing could be done to save the crops; and it was only the help of neighbours which induced the cultivators to do even what is that of digging earth for the embankments, to leave the public works where they were engaged to take to rat-killing as a regular occupation. Vaccine men were the most successful rat-killers though all sorts of Government officials and many Natives took to the same business. The excavators were utterly unable to cope with the vermin and in most cases they refused to exert the necessary energy to dig them out of the burrows in their fields. Nothing but the exertions of Government officials including the Assistant Collectors, the Collector Inspector and all the Sub Inspectors and of the police also would have succeeded in urging the villagers to turn out in large numbers to destroy the pests which were infesting their own fields. It was often found necessary to impress upon the ryots that no remissions would be given in future of the destruction of crops by rats were urged as an excuse for not paying the

The report on the working of the School has been already submitted to you with my letter No. 2444 dated the 4th May last in which I have dwelt on the improvements introduced for the management of the Institution. The School Committee have met regularly once and often twice a month to inspect the Students' Muster Roll of Attendance and dispose of all business connected with the Institution. The Executive Engineer of Dharwar and the Executive Engineer for Irrigation who are members of it do great service by prescribing tests for the pupils'

Assurance ~~and~~ upon responsibility of village officers for securing ~~that~~ their co-operation for the destruction of rats were attended to, had often to be insisted upon and the result has been that the spring crops of wheat and cotton which were almost annihilated last year were this year quite free from the ravages of rats and everywhere the Ryots have gratefully acknowledged the beneficence of the British Government which freed them from those pests which they were quite unable to destroy without Government aid from their want of energy, capital and ability to combine for one common object.

A few years ago fresh New Orleans Cotton seed was introduced into this district. In the preceding year the yield of this seed was collected from the Ryots and ginned under the Superintendence of the Cotton Inspector. The seed so raised was again distributed this year amongst the cultivators of the several talukas. Again in the year under report Government have kindly supplied this district with a fresh supply of 57 maunds of seed of this staple. The importation of this seed is likely to have an excellent effect

~~effect in discharging the extra stipend boys~~
~~in district.~~

42. School of Industries. The working of this Institution during the year under report has been very satisfactory. The average daily attendance during the year was 30.8. There are 38 boys who have passed in the Government Examination.

Standard:	No. of boys

The report on the working of the School has been already submitted to you with my No. 2244 dated the 1st May last in which I have dwelt on the improvements introduced for the management of the Institution. The School Committee have met regularly once and often twice a month to inspect the Students' Muster Roll of attendance and dispose of all business connected with the Institution. The Executive Engineer of Dharwar and the Executive Engineer for Irrigation who are members of it discharge duties by prescribing tests for the pupils

Communication. The Contractors have made more work and earned more money than the year before — Several large contracts for the Local Fund and other public works are undertaken by it this year. The attendance of the Students and their progress also improved this year.

Horse Breeding. Measures are taken to keep in the Collectorate for the improvement of the breed of horses. The wealthier Ryots take a pride in having fine oxen and pay large sums for them. It might be well to encourage this by having good bulls imported for breeding purposes. The breed of ponies might also be improved by the establishment in this district of one or two good pony stallions, either Deccani, or Arab, or even Peccanee. The number of Tongas drawn by Country ponies is increasing in this district, but a good strong breed of ponies is much wanted in the Southern Mahratta Country.

IV. Civil.

44. The Extent to which Government resorted to litigation and the result thereof during the year under report, is summarized below and given in detail in Appendix E.

Pending on 1st July 1879	Additional 1879-80	Disposed of For Government		Against Government		Pending on 30th June 1880	
Original	Appeal	Original	Appeal	Original	Appeal	Original	Appeal
2	2			3			

No important decisions have been passed during the year under report either in favour of or against Government. Last year one appeal was shewn as pending on the 30th June 1879; but it was remanded by the High Court for reception of fresh evidence and decision thereon. This appeal was brought on the file of original suits in the District Court; hence two original suits are shewn as pending on the 31st July 1879, although in the previous year's report only one original suit was described to be pending on that date. The same reason accounts for the non-appearance in the above table of the one appeal case which was said to be then pending in last year's report.

Examination. The Factory has made more work and earned more money than the year before. Several large contracts for the Local Funds and other public works are undertaken by it this year. The attendance of students and their progress has also improved since last year.

Horse breeding. There are 12 stallions kept in this district for the improvement of the breed of horses. The wealthier Ryots take a pride in having fine oxen and pay large sums for them. It might be well to encourage this by having good bulls imported for breeding purposes. The breed of ponies might also be improved by the establishment in this district of one or two good pony stallions, either Segus, or Arabs or even Waleeanee. The number of Tongas drawn by country ponies is increasing in this district, and a hardy strong breed of ponies is much wanted in the Southern Mahratta Country.

IV. Civil.

44. The Extent to which Government is involved in litigation and the result there of during the year under report is summarized below and given in detail in Appendix I

The cause [illegible] for the non-appearance in the [illegible] of the appeal case when [illegible]

45. The Mamlatdars' decisions under Bombay Act III of 1876 have been dealt with to the extent shewn below:

Year.	Number of cases decided.	Number examined. On reference from Assistants.	Personally.
1879-80	162.	126.	21.

It will be observed from this that out of 162 cases decided by the Mamlatdars, 142 were examined. The irregularities in two cases, one decided by the Mamlatdar of Bankapur and the other by that of Karajgi, were reported to their Lordships the Judges of the High Court, who declined to interfere unless on application from the parties injured. The exact proportion of suits unsatisfactorily disposed of or in the disposal of which unnecessary delay occurred was to the total number examined as 6·3 per cent. Upon the whole the working of the Mamlatdars' Act in this Zilla has been satisfactory.

V. Magisterial.

46. The general state of crime and the action on it of the Magisterial Authorities

are shewn in the following table :

Year	Offences	Number of persons dealt with by Magistrates	Number of persons dealt with by Sessions Court	Number of persons convicted	Number remanded at the end of the year
1878-79	3627	4673	320	2770	59
1879-80	3399	4385	83	1997	36

The number of offences and of persons dealt with, is less in the year under report than in the previous year, but the number of convictions compared with the persons dealt with in the year under report is only 45.5 while the per centage of convictions compared with the number of accused persons dealt with in the year 1878-79 was 61.6

47. The exercise of the own jurisdiction as District Magistrate has been to the extent shewn in the following table :

Year.	Original Cases	Accused		Appellate Cases			Scrutinies Cases	
	No of cases tried	Convicted	Acquitted	Confirmed	Modified	Reversed	Examined	Further action taken.
1878-79	14	5	6	13	7	11	1931	8
1879 80	5	2	4	15	4	5	1660	11

The 2nd and 3rd Class Magistrates have generally conducted their Magisterial duties in a satisfactory manner. In my letter No 2023, dated the 17th

45. The Mamlutdars' decisions under Bombay Act III of 1876 have been superseded to the extent shewn below:

Year.	Number of cases decided.	Number examined. On reference from Apistants.	Personally.
1879-80	162.	121.	21.

It will be observed from this that out of 162 cases decided by the Mamlutdars, 142 were examined. The irregularities in two cases, one decided by the Mamlutdar of Bankapur and the other by that of Karajgi, were reported to their Lordships the Judges of the High Court, who declined to interfere unless on applications from the parties injured. The exact proportion of suits unsatisfactorily disposed of, or in the disposal of which unnecessary delay occurred was to the total number Examined as 6·3 per cent. Upon the whole the working of the Mamlutdars' Act in this Zilla has been satisfactory.

V. Magisterial.

46. The general state of crime and the action on it of the Magisterial authorities

are shewn in the following table

Year.	Offences	Number of persons dealt with by Magistrates	Number of persons dealt with by Sessions Court	Number of persons convicted	Number acquitted at the trial
1878-79	3627	4573	120	2770	59
1879-80	3399	4306	83	1997	30

The number of offences and of persons dealt with, is less in the year under report than in the previous year; but the number of convictions compared with the persons dealt with in the year under report is only 46.5 while the percentage of convictions compared with the number of accused persons dealt with in the year 1878-79 was 56.6.

47. The exercise of my own jurisdiction as District Magistrate has been to the extent shewn in the following table:

Year.	Original Accused		Appellate Cases			Scrutinies Cases	
	No of cases tried	Convicted	Acquitted	Confirmed	Modified	Reversed	Examined	Further action taken.
1878-79	14	5	6	13	7	11	1931	8
1879 80	5	2	4	15	4	5	1660	11

The 2nd and 3rd Class Magistrates have generally conducted their Magisterial duties in a satisfactory manner. In my letter No 2023, dated the 7th

45. The Mamlutdars' decisions under Bombay Act III. of 1876 have been superseded to the extent shewn below:

Year.	Number of cases decided.	Number examined on reference from Assistants.	Number examined Personally.
1879-80	162.	121.	21.

It will be observed from this that out of 162 cases decided by the Mamlutdars, 142 were examined. The irregularities in two cases, one decided by the Mamlutdar of Bankapur and the other by that of Karajgi, were reported to their Lordships the Judges of the High Court, who declined to interfere unless on applications from the parties injured. The exact proportion of suits unsatisfactorily disposed of, or in the disposal of which unnecessary delay occurred was to the total number Examined as 6·3 per cent. Upon the whole the working of the Mamlutdars' Act in this Zilla has been satisfactory.

V. Magisterial.

46. The general state of crime and the action on it of the Magisterial auth-

are shewn in the following table

Year.	Offences	Number of persons dealt with by Magistrates	Number of persons dealt with by Sessions Court	Number of persons convicted	Number undisposed of at the end of the year
1878-79	3627	4673	320	2770	59
1879-80	3399	4305	83	1997	35

The number of offences and of persons dealt with, is less in the year under report than in the previous year; but the number of convictions compared with the persons dealt with in the year under report is only 46.5 while the per centage of convictions compared with the number of accused persons dealt with in the year 1878-79 was 56.6.

47. The exercise of my own jurisdiction as District Magistrate has been to the extent shewn in the following table:

Year.	Original Cases	Accused					Appellate Cases	Scrutinies
	No of cases tried	Convicted	Acquitted	Confirmed	Modified	Reversed	Examined	Further action taken.
1878-79	14	5	6	13	7	11	1931	8
1879-80	5	2	4	15	4	5	1610	11

The 2nd and 3rd class Magistrates have generally confined their Original cases

April last. I brought to the notice of the Commissioner a case wherein the 3rd Class Magistrate at Hangal Rao Sahib Bandurang Garrison had convicted of theft a Police Patil on insufficient evidence, his real offence being that he had an intrigue with the Prosecutor's daughter, on account of which a complaint was made. In 1660 cases the proceedings and records were examined by my office. Out of these I personally inspected the papers in 95 cases.

48 The statistics as regards cognizable and non-cognizable offences are not given here as their embodiment in the Collectors' Administration Reports has been dispensed with by Government Resolution No 5055, dated the 22nd September last (Revenue Department).

49. The village Police are under the authority of the district magistrate and the District Superintendent of Police, the powers under section 44 of Bombay Act VII of 867 having been conferred upon him. The principal facts regarding the office of Police Patels are given in the following table

Year	Police Subordinates convicted of	Persons punished by		agencies		
		Fine	Dismissal	on death or resignation	by retaliation	by dismissal
1878-79	11	31	7	61	196	8
1879-80	1402	82	7	66	198	705

There were 80 Police Patels in the previous year invested with powers under section 15 of Bombay Act VIII of 1867. In the year under report, one of them was [illegible]. They conducted their duties generally in a satisfactory manner.

50. The visitation of the District Jail was duly performed as enjoined in section 45 of Bombay Act II of 1874 in the standing orders of Government as shewn in the marginal table. The negligence of the Jailor in allowing a notorious criminal to escape was brought to notice by the District Magistrate and the Superintendent of Police; and in consequence the Jailor was transferred to Ratnagiri.

Year	How often the District Jail was visited by			
	the District Magistrate	Assistant or Deputy Collector	Other 1st Class Magistrates	
1879-80	13	4	28	

51. The working of the Cattle Trespass Act is shewn in the following table:

April last. I brought to the notice of the Commissioner a case wherein the 3rd Class Magistrate at Nangal Rao Saheb Pandurang Narayan had convicted of theft a Police Patel on insufficient evidence, his real offence being that he had an intrigue with the prosecutor's daughter-in-law respecting which no complaint was made. In 1660 cases the proceedings and record were examined by my office. Out of these I personally inspected the papers in 95 cases.

48. The statistics as regards cognizable and non-cognizable offences are not given here as their embodiment in the Collector Administration Reports has been dispensed with by Government Resolution No. 055, dated the 22nd September last (Revenue Department).

49. The village Police are under the authority of the District Magistrate and the District Superintendent of Police, the powers under section 44 of Bombay Act VII of 1867 having been conferred upon him. The principal facts regarding the office of Police Patels are given in the following table.

Years	Police Patel-ships in the Collectorate	Police Officers punished		Vacancies			
		Fine	Dismissal	Deaths or resignations	by retirement	by dismissal	Vacant on 30th June
1878-79	1411	21	7	61	196	8	124
1879-80	1402	22	7	66	198	10	124

There were 20 Police Patels in the previous year invested with powers under section 16 of Bombay Act VIII of 1867. In the year under report, one of these died. They conducted their duties generally in a satisfactory manner.

50. The visitation of the District Jail was duly performed as enjoined in section 45 of Bombay Act II of 1874 in the standing order of Government as shewn in the marginal table

Year	How often the District Jail was visited by the District Magistrate	Hujur Deputy Collector	Other 1st Class Magistrates
1879-80	13		20

The negligence of the Jailor in allowing a notorious criminal to escape was brought to notice by the District Magistrate and the Superintendent of Police; and in consequence the Jailor was transferred to Ratnagiri.

57. The working of the Cattle Trespass Act is shewn in the following table

April last I brought to the notice of the Commissioner a case wherein the 3rd Class Magistrate at Nangal Rao Saheb Pandurang Narayan had convicted of theft a Police Patel on insufficient evidence, his real offence being that he had an intrigue with the Prosecutor's daughter-in-law respecting which no complaint was made. In 1660 cases the proceedings and record were examined by my office - out of these I personally inspected the papers in 95 cases.

48. The statistics as regards cognizable and non-cognizable offences are not given here as their embodiment in the Collectors' Administration Reports has been dispensed with by Government Resolution No 5055, dated the 22nd September last (Revenue department).

49. The village Police are under the authority of the District Magistrate and the District Superintendent of Police, the powers under section 44 of Bombay Act VII of 1867 having been conferred upon them. The principal facts regarding the office of Police Patels are given in the following table

Year.	Police Patels in the Collectorate	Police offences punished by		Vacancies			
		Fine	Dismissal	on death or resignation	by rotation	by dismissal	Vacant on the 30th June
1878-79	141	31	7	61	196	8	
1879-80	140	32	7	66	198	7	

There were 30 Police Patels in the previous year invested with powers under section 15 Bombay Act VIII of 1867. In the year under report, one of them died. They conducted their duties generally in a satisfactory manner

50. The visitation of the District Jail was duly performed as enjoined in section 40 of Bombay Act II of 1874 in the standing orders of Government as shewn in the marginal table.

Year.	How often the District Jail was visited by			
	the District Magistrate	Deputy Collector	Other Magistrates	Visiting Committee
1879-80	13	4	28	

The negligence of the Jailor in allowing a notorious criminal to escape was brought to notice by the District Magistrate and the Superintendent of Police; and in consequence the Jailor was transferred to Ratnagiri.

57 The working of the Cattle Trespass Act is shewn in the following table

Years	Numbers of Pounds	Cattle impounded	Receipts	Expenditure	Balance Transferred to Local Funds	Balance Transferred to Municipal Funds
1878-79	285	1388	1477	1886.9.7	3795.12.8	1279.18.2	85.5.-
1879-80	288	1381.5	868	1072.11.8	3968.6.7	6166.9.3	895.11.6

This shows an increase in the number of cattle impounded during the year under report: the decrease in the receipts is owing to a smaller number of impounded cattle having been sold during the year under report than in the preceding year.

12. In the year under report Act XI of 1878 was in force in this District. The following table shews the number of Licenses to carry arms issued during the year as compared with those of the previous year.

Year	Licenses issued. Dealing in arms	Carrying arms	Penalties. Travelling cases	Amount
1878-79	4	269	1	1	-	-
1879-80	4	290	4	1	10	1

This shows an increase in the number of licenses for carrying arms issued during the year under report. I constantly receive numbers of applications for the grant of licenses to carry

arms

arms. This will increase the stamp revenue as applications for licenses are required to be drawn on stamped paper of the value of eight annas for each arm carried, while before the passing of the new Act an application for any number of arms was allowed to be made on an eight annas stamped paper.

VI. Public Works.

53. The District Local Fund Committee has during the year held only one meeting —

Meeting	Date.	Members present	
Budget and Accounts	25th April 1879	10.	noted. Almost all the work was disposed

of by correspondence; consequently there was no necessity for assembling any special meetings. All Works costing above Rs 1000. and requiring professional skill were executed by Public Works Agency.

54. The Receipts and Disbursements during the year under report were as follows:

Years	Number of pounds	Cattle impounded	Sold	Receipts	Expenditure	Balance Transferred to Local Fund	Balance Transferred to Municipal Fund
1878-79	285	1338	1477	1885 4 9	7 8795 12 5	12791 8 2	867 5
1879-80	285	1381	363	1071 2 11	8 3950 6 7	6166 9 3	875 11

This shows an increase in the number of cattle impounded during the year under report; the decrease in the receipts is owing to a smaller number of impounded cattle having been sold during the year under report than in the preceding year

52. In the year under report Act XI of 1878 was in force in the District. The following table shows the number of Licenses to carry arms issued during the year as compared with those of the previous

Licenses issued.

Year	Dealing in arms	Carrying arms	Travelling cases	Amount
1878-79	4	269	/	
1879-80	4	290	/	10

This shows an increase in the number of licenses for carrying arms issued during the year under report. I constantly receive numbers of applications for the grant of licenses to carry

arms

will increase the stamp revenue as applications for licenses are required to be drawn on stamped paper of the value of eight annas for each arm carried. While before the passing of the new Act an application for any number of arms was allowed to be made on eight annas stamped paper.

VI. Public Works.

53. The District Local Fund Committee has during the year held only one meeting on the date marginally noted. Almost all the work was disposed of by correspondence; consequently there was no necessity for assembling any special meetings. All Works costing above Rs 1000. and requiring professional skill were executed by Public Works Agency.

Meeting	Date	Members present
Budget and Accounts	25th September 1879	10.

54. The Receipts and Disbursements during the year under report were as follows:

Years	Number of pounds	Cattle impounded	Cattle Sold	Receipts	Expenditure	Balance transferred to Local Funds	Balance transferred to Municipal Funds
1878-79	285	13338	1477	18857 9 7	5195 12 5	12791 8 2	867 5 -
1879-80	285	13815	868	10712 11 8	3960 6 11	6166 9 3	595 11 6

This shows an increase in the number of cattle impounded during the year under report; the decrease in the receipts is owing to a smaller number of impounded cattle having been sold during the year under report than in the preceding year.

52. In the year under report Act XI of 1878 was in force in the district. The following table shews the number of Licenses to carry arms issued during the year as compared with those of the previous

Year	Licenses issued. Dealing in arms	Carrying arms	Travelling cases	Penalties. Amount
1878-79	4	269	1	- - -
1879-80	4	290	4	1 10 - -

This shews an increase in the number of licenses for carrying arms issued during the year under report. I constantly receive numbers of applications for the grant of licenses to a

arms. This will increase the stamp revenue as applications for license are required to be drawn on stamped paper of the value of eight annas for each arm carried. While before the passing of the new Act an application for any number of arms was allowed to be made on an eight-anna stamped paper.

VI. Public Works.

53. The District Local Fund Committee has during the year held only one meeting

Meeting	Date	Members present
Budget and Accounts	25th September 1879	10.

on the date marginally noted. Almost all the work was disposed of by correspondence; consequently there was no necessity for assembling any special meetings. All Works costing above Rs 1000. and requiring professional skill were executed by Public Works Agency.

54. The Receipts and Disbursements during the year under report were as

Receipts.			Disbursements.		
Balance on 1st April 1879	90779	2 4	Establishment	28124	6
One anna cess (3/4 rds)	11903	7 10	New Works	6497	7
Tolls	9925	12 5	Repairs	57018	-
Ferries	2546	- -	Provincial Contributions	2000	-
Pounds	1042	7 2	Medical Charges	1878	-
Travellers Bungalows	-	- -	Miscellaneous	2184	-
Contribution	12407	2 -	Total	155221	14
Miscellaneous	1523	16 11	Balance on 31st March 1880	9108	10
Total	155511	6 4			
Grand Total	164330			164330	

These figures are arrived at from the Accounts furnished by the Executive Engineer and the Huzur Deputy Collector, and are subject to adjustments to be effected in the Accountant General's Office when finally closing his Accounts in the month of September next. The discrepancy between the closing balance of the year preceding and the opening balance of the year under report as shewn above is attributable to the same cause as was pointed out in my last year's Administration Report, Viz: that the figures of last year were obtained before the closing of the Annual Accounts by the Accountant General and thus were not verified.

55. The receipts show an increase of Rs 6293. 8. 7 compared with those of the year previous attributable partly to the levy of Local Funds on service lands and partly to the revision of Assessments. The principal objects of expenditure were as shewn in the margin:

Under the heading "Original Works", the number of miles of roads entered, viz: 37¼ does not mean that so many miles of road were completed throughout, but merely that roads to that extent are in progress. The Dharmavaka at Valvadi in the Nellore Cuddapah commenced last year

The road from Navalgund to Annigery for the construction of which Rs 26702 were estimated has its three culverts and three drains completed; and a considerable quantity of murram has been collected and spread on it. A revised estimate amounting to Rs 44820 has been sanctioned by Government for its improvement. This road will join Navalgund to great cotton district with Hubli the terminus of the proposed railway.

The completion of the road from Gadag to Ron which is a portion of the road from Sirsy in North Kanara to Badami in Kaladgi which has been entered in the Quinquennial budget and estimated at Rs 26421 for the portion from Nagsamudra to Kotamchgi was taken in hand and Rs 5775 have been spent on it during the year under report. This road also when thoroughly completed will serve as an important feeder to the Goa and Hubli Railway, the Survey of which has already been undertaken. Besides these the metalling of the Dharwar and Halial road 17 miles in length in the

Dharwar taluka, the estimate for which amounts to Rs 21928 has been commenced

A considerable sum of Rs 19246 has been expended in the improvements of the water-supply in this district chiefly in the blacksoil talukas where the scarcity of water in the hot season is the chief drawback to the comfort of the people residing therein.

56. No [redacted] Imperial or Provincial Works were in progress during the year under report:

Name of Work.	Expenditure.
Imperial Original Works.	
Military Buildings.	
Paving with stone the floors of the Hospital of Her Majesty's XVII Regiment N. I.	1529 - -
Constructing a room for storage of Camp Equipage in rear of Her Majesty's XVII Regiment.	389 - -
Civil Buildings.	
Constructing a Post Office at Gadag	1679 - -
Provincial.	
Constructing a shed for Patels and Kulkarnees at the Hangal Mamlatdar's Kacheri	301 - -
Altering the present Treasury Room in the Collector's Office.	521 - -
Improving the Record-room, Collector's Office	145

The road from Nawalgund to Annigery for the construction of which Rs 46702 were estimated has its three culverts and three drains completed, and a considerable quantity of murram has been collected and spread on it. A revised Estimate amounting to Rs 44820 has been sanctioned by Government for its improvement. This road will join Nawalgund (great cotton district) with Hubli the terminus of the proposed railway.

The completion of the road from Gadag to Ron which is a portion of the road from Sirsy in North Kanara to Badami in Kaladgi which has been entered in the Quinquennial budget and estimated at Rs 26421 for the portion from Nagsamudra to Kolamchgi was taken in hand and Rs 6775 have been spent on it during the year under report. This road also when thoroughly completed will serve as an important feeder to the Goa and Hubli Railway, the Survey of which has already been undertaken. Besides these the metalling of the Dharwar and Halial road 17 miles in length on the

Dharwar taluka, the estimate for which amounts to Rs 21928 has been commenced.

A considerable sum of Rs 19246 has been expended in the improvements of the water-supply in this district chiefly in the blacksoil talukas where the scarcity of water in the hot season is the chief drawback to the comfort of the people residing therein.

56. The following works of public improvement at the charge of Imperial or Provincial Funds were in progress during the year under report:

Name of Work.	Expenditure
Imperial Original Works.	
Military Buildings.	
Paving with stone the floors of the Hospital of Her Majesty's XVII Regiment N. I.	1529
Constructing a room for storage of Camp equipage in rear of Her Majesty's XVII Regiment.	389
Civil Buildings.	
Constructing a Post Office at Gadag	1679
Provincial.	
Constructing a shed for Patels and Ryots near the Hospital Mamlatdar's Court.	301
Alterations in the present Treasury Room in the Collector's Office.	531
Improvements in the Revenue Commissioner's Office	[illegible]

The road from Kawalgund to Ainapur for the construction of which Rs 26702 were estimated has its three culverts and three drains completed, and a considerable quantity of murram has been collected and spread on it. A revised Estimate amounting to Rs 44820 has been sanctioned by Government for its improvement. This road will join Nawalgi great cotton district with Hubli the terminus of the proposed railway.

ment at the charge of Imperial or Provincial Funds were in progress during the year under report:

Nature of Work.	Expenditure
Imperial Original Works.	
Military Buildings.	
Paving with stone the floors of the Hospital of Her Majesty's XVII Regiment N. I.	1529 . .
Constructing a room for storage of Camp equipage in rear of Her Majesty's XVII Regiment.	389 . .
Civil Buildings.	
Constructing a Post Office at Gadag	1679 . .
Provincial.	
Constructing a shed for Patels and Talukdars at the Hangal Mamlatdar's Cutcherry	301 . .
Altering the present Treasury Room in the Collector's Office	521

Communications.			
Constructing a first class road from Gadag, via Dumbal, to Hesrur	1747		-
Constructing a bridge over the Hulkoti Nulla on Karwar and Bellary road	3605		
Improving the Dharwar and Kinai Ghaut Road	2818		-
Total	13272	-	-

These were the principal works on which Expenditure from Provincial and Imperial funds was made during the year under report. The road to Hesrur which is on the borders of the Bellary Zilla is a great necessity. There are many unbridged Nullas on it and the six miles from Munderagi to Hesrur on the Tungbhadra river are as yet unbroached, and the roads there is in many parts heavy with sand. This is in striking ~~contrast with the~~ with the good condition of the same road on to Bellary on the opposite side of the river. The traffic between Bellary and Gadag would be far greater than now if this road were in good order throughout this district as it is the only way by which cotton can go from the great cotton mart at

Gadag

Gadag to Bombay after the commencement of the monsoon. The Railway from Bellary to Bombay via Poona conveys cotton to the Presidency town in less time than it can go at present the short distance of 60 miles from Gadag to Hubli during the monsoon.

The information regarding the expenditure incurred by the Collector and the Superintendent of Police on account of petty construction and repairs is given in appendices H and K.

VII. Municipalities.

57. The total number of Municipalities and their classification is shewn in the margin.

City Municipalities	0
Town Municipalities	9
Total	9.

Three new Municipalities viz: at Hangal, Haveri and Byadgi were established during the year under report.

As regards the Hangal Municipality the District Deputy Collector was strongly against its being maintained as such. The reasons assigned by him being that the inhabitants there were poor agriculturists

VIII. Education.

59 The following is an account of the funds administered by the District Local Funds Committee:

Receipts	Amount			Disbursement	Amount		
Balance on 1st April 1879	6344	3	10	Supervision	370	11	4
School fee fund	6451	9	6	School Charges	6994	11	8
3 of one anna cess	5951	11	11	Scholarships	3844	5	11
Contribution from Government	1920			School houses (new)	1634	2	3
				Do Do repairs	3080	1	6
Contribution from private persons	150			Miscellaneous	1167	10	7
Miscellaneous	1349	10		Balance on 31st March 1880	6754	8	
Total	16227	3	3	Total	16227	3	3

There is a difference of Rs 13172 between closing balance on the 31st March 1879 and the opening balance on 1st April 1879. This difference is accounted for by the Educational Inspector S. D. to be owing to the subsequent adjustments effected by the Accountant General. A copy of the Educational Inspector letter explaining this discrepancy is appended to this report. Seven new School-houses have also been built from Local Funds during the year under report, and three were in progress.

60. The principal statistical relations of Education are given in the following table

Year	Schools				Number of Scholars (entering the Schools)	Number of Inspections
	Superior		Primary			
	No	Scholars	No	Scholars		
1878/79	2	239	264	9689	100	
1879/80	2	287	296	13445	125	6

This table shows that there has been an increase in the number of scholars attending the Primary Schools during the year under report of rather more than 39 per cent. This result speaks favourably for the working of the Educational department. During my tour in the district I inspected 36 Schools Some of the School houses were found to be wanting in sufficient light and ventilation Copies of my remarks on these and other matters such as School discipline etc. were forwarded to the Educational authorities for information.

VIII. Education.

59. The following is an account of the funds administered by the District Local Funds Committee:

Receipts	Amount	Disbursement	Amount
Balance on 1st April 1879	63449 3 10	Supervision	370 11 4
		School Charges	69948 11 8
School fee fund	6451 [redacted]	Scholarships	3844 5 11
½ of one anna cess	59514 11 11	School houses (new)	16316 2 3
Contribution from Government	19209 - -	Do. Do. repairs	3080 1 6
Contribution from private persons	150 - -	Miscellaneous	1167 10 7
		Balance on 31st March 1880	67542 8 -
Miscellaneous	13495 10 -		
Total	162270 3 3	Total	162270 3 3

There is a difference of Rs 13172 - - 7 between the closing balance on the 31st March 1879 and the opening balance on 1st April 1879. This difference is accounted for by the Educational Inspector S. D. to be owing to the subsequent adjustments effected by the Accountant General. A copy of the Educational Inspector's letter explaining this discrepancy is appended to this report. Seven new School-houses have also been built from Local Funds during the year under report, and three were in progress.

60. The principal statistics relating to education are given in the following table

Year	Schools				Number of Scholarships (including Scholarships tenable at Training Colleges)	Number of new School houses erected.
	Superior		Primary			
	No	Scholars	No	Scholars		
1878-79	2	239	254	9639	100	7
1879-80	2	287	296	13445	125	6

This table shows that there has been an increase in the number of scholars attending the Primary Schools during the year under report of rather more than 39 per cent. This result speaks favourably for the working of the Educational department. During my tour in the district I inspected 36 Schools Some of the School houses were found to be wanting in sufficient light and ventilation. Copies of my remarks on these and other matters such as School discipline etc. were forwarded to the Educational authorities for information.

VIII. Education.

59. The following is an account of the funds administered by the District Local Funds Committee:

Receipts	Amount	Disbursement	Amount
Balance on 1st April 1879	6344 9 10	Supervision	370 11 4
School fee fund	645 9 6	School Charges	6994 8 11
½ of one anna cess	5951 4 11	Scholarships	384 5 11
Contribution from Government	1920 - -	School houses (new)	1631 2 3
Contribution from private persons	150 - -	Do Do repairs	308 1 6
Miscellaneous	134 9 5 10 -	Miscellaneous	116 7 10 7
		Balance on 31st March 1880	6752 8 [illegible]
Total	16227 3 3	Total	16227 3 3

There is a difference of Rs 131 7 2 between the closing balance on the 31st March 1879 and the opening balance on 1st April 1879. This difference is accounted for by the Educational Inspector S. D. to be owing to the subsequent adjustments effected by the Accountant General. A copy of the Educational Inspector's letter explaining this discrepancy is appended to this report. Seven new School-houses have also been built from Local Funds during the year under report, and three were in progress.

60. The principal statistics relating to education are given in the following table

Year	Schools				Number of Scholarships (including Schools only including the Training College)	Number of School houses erected.
	Superior		Primary			
	Nº	Scholars	Nº	Scholars		
1878-79	2	239	254	9639	100	7
1879-80	2	287	296	13445	125	6

This table shows that there has been an increase in the number of scholars attending the Primary Schools during the year under report of rather more than 39 per cent. This result speaks favourably for the working of the Educational department. During my tour in the district I inspected 36 Schools. Some of the School houses were found to be wanting in sufficient light and ventilation. Copies of my remarks on these and other matters such as School discipline etc. were forwarded to the Educational authorities for information.

IX. Special Duties.

61. No Special duties have during the year under report devolved upon the Collector.

I have the honour to be;

Sir,

Your most obedient servant,

Ag. Collector, Dharwar.

No. 5 of 1880

From Fairlie Mews Esquire
Assistant Collector
and Magistrate 1st Class

To Elphinston Esquire
Collector and District
Magistrate, Dharwar District

Camp Dharwar 10th July 1880.

Sir,

I have the honor to submit the annual Report on the administration of my charge. This is composed

Talukas	Area in square miles	Population
Gadag	701	85,824
Hubli	310	79,248

But now famine prices exist no longer; In the Trundarga Pota

Food grain of the lower classes is at the present time twice as cheap as it was fifteen or twenty months ago. Famine prices as a rule go up with a bound; they go down very gradually. This has been the case here. Prices have not yet fallen to their usual level. Their down-ward movement, though gradual, has been decided and regular.

Rice certainly — the great crop in the

country lying to the West of the watershed - was a poor crop. But other cereals (and other crops) but cotton were above the average. One or two more such years and the effects of the famine will be effaced.

As to cotton - the out-turn of the indigenous kinds was good; while the crop of the exotic variety was a very poor one.

This has as far as I can learn, been more or less the case for some years now. The agriculturist and, following him, the local official everywhere attribute this to the unreasonably long continuance — this year and for some years past it is said — of the bitter East winds and the unusual prevalence of night-fogs and mists. The country-cotton survived unhurt; while the foreign kind suffered serious

loss from the blight caused by the wind and fog. The above is no doubt one of the causes of the poor outturn of the foreign variety; but other causes, too, have been at work.

The indigenous plant is hardy — the exotic species, on the other hand, (when grown in these parts) is delicate and very susceptible to the influence of any disadvantageous circumstances. The drought and the rats injured both kinds pretty equally at

This has, as far as I can learn, been more or less the case for some years now. The agriculturist and, following him, the local official everywhere attribute this to an unaccountably long continuance — this year and for some years past it is said of the bitter East winds and the unusual prevalence of night-fogs and mists. The country-cotton survived unhurt; while the foreign kind suffered serious

loss from the blight caused by the wind and fog. The above is no doubt one of the causes of the poor outturn of the foreign variety; but other causes, too, have been at work.

lying fallow since the famine. The assessment, due on it, had not been paid up; But, while efforts were being made to realize the arrears of revenue, ~~from the tenant~~ the land remained on the Government Records as occupied by the defaulter (though it was not cultivated by him). At this year, all such land has, in default of its fetching a fair price at auction, been formally claimed by Government. It appears, now (i.e. this year)

for the first time, as uncultivated; though the actual decrease of cultivation occurred in previous years.

The general condition and prospects of my charge in a material point of view are favorable. In the last para: I have alluded to the return of times of plenty and to the rapid disappearance of all trace of the famine, that pressed so heavily [illegible] especially [illegible] portion of

sure and certain hope
that, to crown all this,
a railway will ere long
run through my talukas.
(G. R. No 147 dated 13th January
1880). A railway is, at
present, the great want
of this part of the country;
the resources of which are
lying, for want of
proper means of communication
with the outer world,
undeveloped to a very
considerable extent. My
charge will be a great
gainer by the construction
of a railway; — a greater —

perhaps than any other part of the country The great trading centres thereon — Hubli and Gadag — will doubtless be specially benefitted

My charge is (as you know) divided by the line of the watershed that passes by Hubli to South Sadas and Bankapur, into two very dissimilar parts; their natural features are distinct; the condition of the one (from almost every point of view) differs

are apparently devoid of trees. Even of scrub-jungle there is little or none. I learnt on the spot that this has not always been so; and that the denudation of these hills had progressed at a rapid pace during the last century. People, 100 or even 60 years ago, feared (so I heard) to cross these hills alone or at night; on account of the wild beasts, that the jungles held. They may do so with impunity now. No large animal would readily

find over on these
now!

And, were these
hills covered with trees,
(may even only with scrub
- jungle), — they would,
presumably, do much to
improve the water-supply
of this thirsty tract. It
is difficult to overstate
the importance of the
question and the good
results, that would follow
from converting these huge
sun-dried bricks (as it
were) into cisterns for
holding the rain and only
